Environmental policy

Australian Security Company Pty Ltd (Aussec) is a leading provider of security products and services in Australia. Established in 1983, Aussec has a proven track record of providing high-quality security solutions to a wide range of clients across all major business sectors.

Our company regards environmental management as a fundamental aspect of a sound business foundation. We are committed to identifying ways of reducing the direct environmental impact of our operations. We identify ways in which our organisation can protect our natural capital and prevent potential impacts or pollution our products and services may have on the environment.

It is our policy to:

- ensure our operations, products and services comply with the *Environmental Protection and Biodiversity Conservation Act 1999* (Cth), in addition to meeting the requirements set down in AS/NZS ISO 14001, industry best practice codes and other standards relevant to our business;
- identify, monitor, and control the environmental impacts of products and services utilised and provided;
- define and communicate environmental aims, objectives, targets and operating procedures to relevant workers and external stakeholders;
- ensure that our people have the knowledge, support and other resources needed to actively engage in, lead and achieve our commitment to environmental care;
- promote similar environmental standards from our suppliers, stockists, and contractors by informing them of our Environmental policy and managing them to ensure their compliance with this policy;
- communicate openly and constructively with our workers, relevant authorities, and the general community to meet the needs and demands of growth that may result from our business products or services; and
- define objectives to manage:
  - pollution, emissions, and waste;
  - the use of raw materials, energy, and supplies; and
  - the procurement of raw materials, energy, and supplies from recycled, sustainable, or renewable sources.

We will monitor and evaluate our company's performance concerning the objectives and targets we have set to identify areas for improvement. We will implement necessary changes to continually improve our performance, the conservation of our resources and the prevention of pollution.

We thank our employees, our suppliers, and our contractors for their cooperation in this endeavour.
